Elkay Stainless Steel Racking

Quality storage solutions for laboratories

Supreme quality stainless steel ra

Using our in-depth knowledge and experience, Elkay can design and manufacture customised racking for individual needs at reasonable costs. We can also help you make the most effective use of the space that you have available in your freezer.

Elkay have developed a strong reputation for providing high quality freezer inventory systems at competitive prices.

COMPLETE SOLUTION

Whether you need a single bench top rack or a complete inventory system, we have a solution you can depend on.

QUALITY

Working to ISO9001:2008 standards, our UK based manufacturingsiteensures quality that is robust and

well-finished with no sharp edges.

5-STAR SERVICE

of mouth which is why we pride ourselves on our high-level of repeat business and referred customers. Our trained Territory Managers are on hand to help you get the most out of your space. Contact us now for a free no-obligation consultation.

FREEZER STORAGE SOLUTIONS

UPRIGHT FREEZER

Racking with Dividers

Trays are offered in either standard premium grade with welded corners or cost-saving economy edges. Racks or 'outers' can be 2 to 8 trays high and are available in a variety of sizes to suit most freezers. High-density polypropylene dividers (combs) may be formatted to store virtually any size tube or bottle and are available in 8 colours to help identify samples.

No matter what size box you use, we can store it. Choose from front access with pull-out trays in a variety of formats or a racked, side access system.

Racking for Microtitre Plates

Open or lidded, shallow or deep, all plates can be accommodated in our made-to-measure rack. Racks can store plates individually or in stacks and can be open fronted with front retaining rods (to ensure plates remain secure in the rack) or with removable front covers.

Bins for General Storage

When you need to store a wide variety of samples, Elkay stainless steel bins can accommodate virtually anything. With several lid options like drop on, hinged or lockable and the added choice of removable or fixed stainless steel dividers, we will help you make the most of your available space.

CHEST FREEZER

Racking with Dividers

Racks are available in full or half height, with a choice of solid or open sides, individually wired compartments or shelves with lipped fronts and front retaining rods to ensure boxes/plates remain secure in the racks.

Racking for Boxes and Microtitre Plates

As well as all of the features you get with the upright freezer offering, these racks also come in full or half height, solid or open sides; individually wired compartments, shelves with lipped fronts or front retaining rods.

icks suitable for all makes and models of freezers

LABORATORY RACKS AND TRAYS

TEST TUBE/WATER BATH RACKS

Elkay stainless steel test and water bath tube racks are ideal when a robust, quality solution for test tube storage is needed, either for use on top of the bench or in a freezer. All racks are autoclavable and are available with two levels, making them ideal for use with roundbottomed tubes and for taller tubes requiring additional support. A bespoke design service is available to accommodate specific bath sizes.

PETRI DISH RACKS

Available with open or solid backs, for large or small dishes. Convenient label card holders are optional on the front for easy recognition of samples.

MICROTITRE PLATE HOLDERS

For the safe and convenient storage of stacks of plates. Ideal for moving several plates within the lab or between buildings.

TRANSPORT BINS

Designed to contain potential leakage during transportation, the body of the box is fully welded with a silicon-sealed lid and a fold-down carry handle for easy carrying. The choice of a hinged or fully removable lid offers flexibility to fit your laboratory requirements, as do the additional choice of internal partitions and removable trays.

AUTOCLAVE BINS

Silicone-sealed autoclave bins are ideal for use with sharp objects or items not suitable for autoclave bags (glass, Pasteur pipettes, etc).

LIQUID NITROGEN INVENTORY SYSTEMS

Racking for liquid nitrogen vessels and dewars is offered in a variety of sizes suitable for use with all leading brands. Blood bag storage, grids, platforms and straw freezing/storage systems are also available.

COLD ROOM RACKING

We can partially or completely fill your cold room with boxes and/or racks plus the associated metal frames to accommodate them. Please contact us for a no-obligation design and measurement consultation.
